

Indiana
Immunization
Coalition: Program
Components

Lisa Robertson, MPH
Executive Director,
Indiana Immunization Coalition
director@vaccinateindiana.org
August 17, 2021

Mission Statement

The Indiana Immunization Coalition exists to reduce the spread of vaccine-preventable diseases through immunization education, advocacy, promotion, and statewide collaborative partnerships.

Education

- Provider and public resources are available free of charge on website
- Continuing provider education in cooperation with IU School of Medicine and Ohio Nurses Association
- Regional and statewide provider update meetings
- E newsletters for providers and advocates
- Maintenance of Certification for licensure of physicians

Advocacy

- Provides guidance and training to Advocacy group
- Provides best –practice immunization updates to state legislators
- Hosts legislative educational forums at the statehouse
- Collaborates with stakeholder agencies to draft policy statements that reflect best practice immunization guidelines

Collaborative Partnerships, to name a few...

- Indiana Department of Health
- County Health Departments
- American Cancer Society
- American Academy of Pediatrics
- IU School of Medicine, Center for HPV Research
- Indiana Cancer Consortium
- Indiana School Nurse Association
- MDWise, Caresource, Anthem

IIC strives to partner with diverse local, regional, and national stakeholders to promote collaborative projects and avoid duplication of efforts.

Kick Off-
September
2020 with
Support from
Indiana State
Department
of Health!

A Medical Director (physician) oversees clinic policies and procedures to ensure best-practice.

Licensed primary care providers such as (nurses, physicians or EMT's administer vaccines

CDC best-practice guidelines are followed when ordering, storing handling, and administering vaccines.

Economic and Racial Disparities are Reduced By:

IIC Mobile Clinics Address Barriers to Vaccination

- Locating clinics in underserved and under-immunized communities that may lack access to care
- Providing language translation that may not exist in traditional medical clinics
- Providing free vaccines to those who cannot pay
- Offering clinics after work hours which is more convenient than traditional medical clinics
- Accommodating walk-ins

IIC Funding Sources

The Indiana Department of Health

- Indiana Department of Health provides consistent funding to the coalition to cover personnel, operating expenses, and ensure sustainability of IIC programming.
- This partnership is written into the IDOH cooperative agreement with CDC.
- IIC and IDOH work together on projects across the state to increase immunization rates. We meet almost weekly to discuss the burning fires in the state.
- IIC can provide services (advocacy, equipment purchase, education materials) that are hard for the state to do.

IIC Funding Sources

Pharmaceutical Grants

- The coalition does accept pharmaceutical funding. We trust our partners and want others to know we trust them.
- Pharmaceutical grants help defray costs associated with some educational, advocacy and promotional activities.
- We receive around \$100,000-\$150,000 in these grants each year.

IIC Funding Sources

Foundations

- National, regional, and local foundation grants are applied towards mobile clinic expenses (paying vaccinators, medical equipment and supplies, translation services).
- These grants allow us to reduce barriers to vaccination by meeting people where they are, serving medical desserts and doing school-based clinics.
- We also focused on specific antigens such as Flu clinics.
- \$100,000-\$150,000

IIC Funding Sources

Other Income Sources

- Exhibit fees from our conferences
- MOC fees
- Clinic billing
- Other partners
